Building State Machine Workflows

Michael Stiefel

Reliable Software, Inc.

www.reliablesoftware.com

development@reliablesoftware.com

Pre-requisites for this presentation:

- 1) Basic understanding of Windows
Workflow Foundation

Level: Intermediate

Goal

Understand how to build State Machine Workflows with Workflow Foundation

Assumptions

Some Understanding of Microsoft
Workflow Foundation

Three Basic Workflow Patterns Out of the Box:

Sequential
State
Rules

Control is Outside the Workflow

Might be Human or Machine Decision

Workflow restricts choices

Simpler than Sequential Workflow

Patient Status Demo

Summary

Control is Outside the Workflow

Might be Human or Machine Decision

Workflow restricts choices

Simpler than Sequential Workflow
